20 Years of GreTai  
Markets Flying high

Ever since the GTSM was established in late 1994, we have always strived to develop a multi-level market that can serve as "the booster of economic vitality and the cradle of successful enterprises." It has been built up to fully meet the financing needs of enterprises in different scales and in different stages. After many years of earnest development, we have established the Main Board for listing, the Emerging Stock Market for pre-listing preparation, a "GISA Stock" for small and micro enterprises, and a "GoFunding Zone" that matches donors with innovative ideas. The GTSM also provides good guidance to enterprises, assists them in raising capital and helps them gain visibility and attract elites.

As one of the most important participants in Taiwan's securities market, the GTSM supports national economic policy with its mission to promote economic development. We nurture Taiwan's local characteristic industries, develop new products, and invigorate market trade volume. We also stepped up communication and cooperation with capital markets around the world to expand new business. As part of our strategic objective of becoming a multi-functional, multi-level and full-fledged exchange, we not only actively nurture emerging high-tech industries, innovative industries, small

and mid-sized enterprises, and micro enterprises to get listed and get financing, but we also strive to build the GTSM into a multi-functional market that covers both centralized trading and negotiated trading. We have diversified products such as stocks, bonds, ETFs, TDRs, and OTC derivatives to meet the various trading needs of investors.

As the GTSM celebrates its 20th anniversary, we stand firm in our commitment to inject momentum for driving industrial upgrades into the capital market by opening up more channels for raising capital, fostering SME growth, and promoting good corporate governance to make companies even attractive. We hope that as we persistently push for the innovation and diversity of financial products and expand market scale, we will build the GTSM into Asia's premier financing hub for SMEs and companies in local characteristic industries. On the one hand, our strategy reflects the government's policies of developing "a wealth management platform" and "financial businesses with cross-Strait characteristics," while on the other hand it opens up more opportunities for industrial upgrading.

為健全資本市場，提高櫃檯買賣市場之功能，我國財政部於檢討櫃檯買賣市場之建制、功能及組織型態等相關問題後，1994年決定以公益性的財團法人組織為主體來推動櫃買市場發展，櫃買中心於焉設立，初期係由中華民國證券商業同業公會、臺灣證券交易所及臺灣集中保管結算所捐助基金而成。

To build up a sound capital market and improve the functions of the GTSM market, Taiwan's Ministry of Finance examined the issues related to the establishment, functions, and organization of GTSM market and decided in 1994 to promote GTSM market development in the form of a public welfare-oriented incorporated organization. This was the birth of the GTSM. In the early period, it was formed by funds contributed from the Chinese Securities Association (CSA), the Taiwan Stock Exchange (TWSE), and the Taiwan Depository & Clearing Corporation (TDCC).

As the preparatory market for enterprises before they are listed, the Emerging Stock Market allows companies that aim to become listed to first familiarize with the regulations and operating mechanisms of the securities market. The ESM also provides a legal, secure, and transparent trading environment for investors who wish to trade unlisted stocks. Before public companies are officially listed, they must first apply for registration as an emerging company and undertake negotiated trading mechanism at a securities firm. Companies that are publically registered on the Emerging Stock Market have no requirements on capital, profitability, or time of establishment. They only need to have recommendations from two or more securities firms, and the GTSM only conducts a review of their financial statements. The Emerging Stock Computerized Price Negotiation and Click System that officially went on-line in 2003 ushered in a new era of emerging stock trading.
